

Detroit Speed
Power Steering Remote Reservoir
P/N: 090603DS

The Detroit Speed Power Steering Remote Reservoir is a fabricated aluminum reservoir that includes a vented cap, an internal baffle to prevent aeration of the fluid, AN fittings; -10 outlet to the pump and a -6 inlet from the gear. It can be mounted anywhere such as the core support or firewall.

The cap may be difficult to open or close at first, so we recommend that you apply a thin film of power steering fluid to the dry rubber seal. This will allow the cap to turn easily to make sure that it is fully closed. Failure to follow this step may result in the cap coming off while driving.

If you have any questions before or during the installation of this product, please contact Detroit Speed at tech@detroitsspeed.com or 704.662.3272
